Introduction

Welcome to the all-new “Collectors’ Coins Great Britain 2005”. Thank-you for purchasing this book.

Those of you that have purchased any previous edition of “Collectors’ Coins Great Britain” will instantly notice that this 2005 edition is quite different to any of its predecessors. In fact, in the long history of Rotographic there hasn’t been such a big change like this since decimalisation put an abrupt stop to the reign of “Check your Change” as the nation’s favourite pocket coin book in 1971, and it had to be remarketed as “Collectors’ Coins Great Britain” .

This book, the 32nd annual edition of that title, features a different, hopefully more useful layout and most importantly all new higher quality images. There have also been a few additions in terms of varieties and snippets of information, and the book stretches further back in time to cover the major re-coinage of 1816, and the Soho mint copper coins.

There have also been many changes behind the scenes; new technology is being used to create and produce the books. A new editor/author is now responsible for the content of all the Rotographic titles. The price data is collected by a new team of numismatists, and the new www.rotographic.co.uk website is also able to gather coin prices, with the help of you, the reader. The 2005 changes were made after careful research with the readership, but if you as a reader feel something else could be improved or even if there is something you don’t like about this “new” book, please feel free to visit the website, or call the number overleaf to have your say. I want to try to ensure that this book gets better every year, and I’m grateful for any kind of feedback.

Good luck with your collection or your price research.

Chris Perkins, www.predecimal.com.

The New Layout

Collectors’ Coins Great Britain 2005 is laid out in four sections:

The first section covers the period 1797-1970 and contains the main “Collectors’ Coins”, that is; all non-proof coins that were issued for circulation and the common mass produced proof coins. This section also covers some of the extremely rare coins of Edward VIII.

The second section contains all the strictly limited proof coins that were never intended for circulation, and most of which are quite rare. It was thought that these rarities got in the way of the normal listings when they were grouped with the circulated coinage. This section covers 1797-1967.

The third section contains Maundy sets and singles. These were never meant for circulation and aren’t proofs, so they too have been moved away from the general circulation and proof sections.

The fourth section contains listings of British decimal coins 1968-2004.

IMPORTANT: This public domain free PDF download is not the latest edition. Most of the coin values in this book have increased significantly since mid 2004 when this document was compiled. Some of the values shown have in fact more than doubled since 2004, a few have even gone down slightly. The newest edition of this publication contains 36 more pages and includes gold coins and a full introduction to each denomination. The latest version is available from www.rotographic.com/downloads.htm

3

How to Use this Priceguide

The first and second sections of this book are ordered in ascending order of face value, starting with the Fractional Farthing and working right up to Crowns (as with all previous editions, gold coins are not included in this book). Each denomination is ordered in ascending date order, with each change in monarch clearly stated as well as major changes in the coin type. All listings are split into columns, with a column each for the Date, Reference number (see below), Mintage figure (also see below) and the market values in 2-4 different grades. The Gothic florins have an extra column for the date in Roman numerals and some of the Crowns have an extra column for the regnal edge year. Each column is clearly labelled.

Mintage figures

It is very important to realise that the mintage figures quoted in this book are very rarely accurate. Until the 1950's the Royal mint did not record the number of coins with a given date, but rather the number of coins struck in a particular year. So for example, the mintage of 1836 Farthings may be quoted as 1,290,240, but it is perfectly possible that a large proportion of those could have been dated 1835 (or even 1837). The mintage numbers do not record the number of coins that for certain types were re-melted either, so don't place any real relevance on the mintage numbers. They are just there to give a general feel for the numbers of coins produced.

Information about the Reference Numbers

Throughout this whole book, usually in the second column, you will notice there are reference numbers. The column in which these numbers appear with either be labelled '**PECK**', '**FMAN**' or '**ESC**' and those abbreviations represent the books from which the reference number is taken. Many dealers will quote the numbers in these books when selling coins, as well as the date and condition. Although they are not normally referred to with newer coins, every coin in this catalogue has been labelled with its reference number from the following publications

PECK = English Copper, Tin and Bronze Coins in the British Museum 1558-1958, by C Wilson Peck. All the Peck numbers in this book are preceded with a 'P' and all the Copper and Brass coins in this book are cross referenced with the Peck volume. Peck Numbers are sometimes referred to by other publications as 'BMC' (British Musuem Collection).

FMAN = The Bronze Coinage of Great Britain, by Micheal J Freeman. This book, which is generally thought of as more up to date with Bronze coinage has been used to provide the reference numbers for all the Bronze coins in this book.

ESC = English Silver Coinage since 1649, by P Alan Rayner. This book has been used to provide reference numbers for all the Silver coins and Cupro-Nickel coins in this book.

It is also important to bear in mind that not all of the coins listed in this book are referred to in the above reference volumes, and where this is the case the initials **ND** (Not Distinguished) will appear in the reference number column. The initials **MV** are also used in places to indicate Minor Varieties are in existence.

IMPORTANT: This public domain free PDF download is not the latest edition. Most of the coin values in this book have increased significantly since mid 2004 when this document was compiled. Some of the values shown have in fact more than doubled since 2004, a few have even gone down slightly. The newest edition of this publication contains 36 more pages and includes gold coins and a full introduction to each denomination. The latest version is available from www.rotographic.com/downloads.htm

An introduction to British Coin Grading

The columns containing the market values in this book are headed by 2-4 Standard British coin grade names. Even novice coin collectors will probably realise that coins that are in better than average condition are always worth more than coins that have seen lots of circulation. Grading coins accurately takes a lot of experience in looking at the same types of coins, but, just as a rough idea this is what the grade columns stand for and mean:

F = Fine: Fine coins show considerable wear to all raised surfaces. Some detail should be visible on the designs and some of the main hair volume should be visible on the Monarch's head. Not individual strands, but maybe a parting or signs of head-dress. Many of the coins in your pocket even after just 30 years or less of normal use would probably be Fine or less.

VF = Very Fine: A coin with some wear to the highest areas of the design but which has seen limited circulation. More hair detail is evident and also detail on the other designs. Just as an average guide a coin that has been in normal circulation for approximately 5 years may qualify for VF status.

EF = Extremely Fine: A coin with little sign of being circulated. There may be only the slightest wear to the highest areas and minimal scratches and other marks. Often some of the mint lustre is visible on coins of this grade. As a rough idea a coin in your change would probably be an EF if it had been lucky and was minted just 1 year ago.

UNC = Uncirculated: Like the name suggests, the coin should be as it left the mint with no signs of circulation or wear. Not necessarily perfect though, because coins can pick up scratches and what are known as 'bag marks' during mass production and contact with other coins at the mint. The coin should have most of its lustre present and some dealers may expect 100% lustre on coins stated as Uncirculated. An Uncirculated coin would be given to you in your change from a freshly opened bag of new coins. So, as you can imagine, Uncirculated coins that are 30, 60 or even 200 years old, are often pretty rare, and very collectable, hence the higher prices for coins in this grade.

BU = Brilliant Uncirculated: BU is not really an official grade but is increasingly used to refer to an Uncirculated coin with full mint lustre. Such coins are also allowed to exhibit minor signs of mass production. In previous editions of "Collectors' Coins" the last grade column was **AFDC** (About Fleur de Coin) but FDC is usually used when referring to Proof coins, so BU appears in the last column of this issue.

You may also see some other grades referred to in this book: **FDC:** Generally only used when talking about special proof strikings, and it means absolutely perfect in every way. **Fair/Good:** Heavily worn, but with clear writing and being identifiable. Only very rare 'Fair' coins have any value.

As well as the basic grades listed on this page, collectors will often encounter grades like 'GVF' for example. This indicates the coin is not exactly a 'VF' (Very Fine). In fact the 'G' stands for 'Good' so a GVF coin would be better than VF but not quite EF. 'N' stands for 'Near' and 'A' for 'About'

So, the range between VF and EF for example looks like this: VF, GVF, NEF, AEF, EF.

IMPORTANT: This public domain free PDF download is not the latest edition. Most of the coin values in this book have increased significantly since mid 2004 when this document was compiled. Some of the values shown have in fact more than doubled since 2004, a few have even gone down slightly. The newest edition of this publication contains 36 more pages and includes gold coins and a full introduction to each denomination. The latest version is available from www.rotographic.com/downloads.htm

5

Where no value is stated

You will notice that for certain coin types only the higher grade columns are present. This is because these coins are not normally collected in lower grades, but that doesn't mean they are worthless in lower grades. Coins of all grades are there to be collected, and if you want to collect a date run of coins, then the grade doesn't really matter. There are some coins that have missing price data in one or more columns, this usually indicates that no data was available for that coin, in that grade.

Silver Bullion Value

All British silver-coloured coins dated before 1947 contain silver, so even very worn coins are at least worth a few pence. Silver coins dated pre 1920 are .925 (92.5% silver) and coins dated 1921-46 are .500 (50%) silver. The value of silver fluctuates daily, but generally dealers will gladly pay around 8-9x face value for all pre 1920 Silver coins, and between 4-5x face value for 1921-46 Silver coins. Bear in mind though, that is decimal face value, so each Threepence has a face value of 1/80th of a GB£ (1.25p). Each Sixpence is 1/40th of a GB£ (2.5p), each Shilling is 1/20th of a GB£ (5p) and each Florin is 1/10th of a GB£ (10p). Halfcrowns are 1/8th of a GB£ (12.5p) and Crowns are a quarter of a GB£, so 25p face value.

Marketing

It is generally accepted that a dealer's buying price for a coin or collection of coins is about 50-75% of his/her selling price. The precise deal will of course depend on how sought after the items are, and whether the dealer already has a buyer in mind. The dealer is in effect out of pocket until a buyer can be found. Bear in mind that the dealer has to make a living, and will only make profit in the long term when the coins can be re-sold.

Cleaning/Polishing and Handling of Coins

Do not go anywhere near any coins with any chemicals/abrasives, or anything harder than a soft toothbrush. If your coins are dirty and are low grade, by all means use soap and water and perhaps a toothbrush to remove loose dirt. Make sure they are thoroughly dried, especially copper/bronze coins. High grade coins should ideally be handled by the edges or with gloves, because even the slightest finger print may knock significant value from the coin. If you have a valuable coin with a cosmetic problem, consult an expert first, or simply try to live with it.

If in Doubt

If you have any queries about the contents of this book or if you need advice concerning your British Coins please do consult the www.rotographic.co.uk website. Frequently asked questions will be posted online, and any important points that are raised will be covered in the next edition.

Section 1: Circulation Coins and Mass-produced Proof Coins

Fractional Farthings:

All fractional farthings were originally issued for colonial use. However, half farthings were made legal tender in the United Kingdom from 1842 - 1869. For that reason all fractional farthings have been listed. For a range of farthings that is second to none

Quarter Farthings (For use in Ceylon)

Victoria 1853 Farthing, showing the Young head

*1838 variety DEF. has just one dot where there should be a colon.

*1840 variety DEF.. has two horizontal dots where there should be a colon.

*1856 E/R in VICTORIA. Also described as R over E. Either R was struck over an incorrect E, or E was wrongly selected to improve a poor R; (or ?)

1845 Type A - Normal straight '8'
 1845 Type B - has an '8' which leans to the left.

| 1881H | 548 | 1,792,000 | £1 | £3 | £20 | £25/£50 |
| Minor varieties of 1881H exist. A full listing will appear in the 2006 edition. | | | | | | |
| 1882H | 549 | 1,790,000 | £2 | £5 | £20 | £50/£70 |
| 1883 | 551 | 1,128,680 | £3 | £7 | £20 | £45/£65 |
| 1884 | 553 | 5,782,000 | £1 | £2 | £4 | £10/£30 |
| 1885 | 555 | 5,442,308 | £1 | £2 | £4 | £10/£30 |
| 1886 | 557 | 7,767,790 | £1 | £2 | £4 | £15/£30 |
| 1887 | 559 | 1,340,800 | £1 | £4 | £15 | £25/£35 |
| 1888 | 560 | 1,887,250 | £1 | £4 | £8 | £15/£40 |
| 1890 | 562 | 2,133,070 | £1 | £3 | £7 | £20/£40 |
| 1891 | 564 | 4,959,690 | £1 | £2 | £12 | £25/£50 |
| 1892 | 566 | 887,240 | £5 | £10 | £30 | £75/£100 |
| 1893 | 568 | 3,904,320 | £1 | £2 | £7 | £20/£45 |
| 1893 | ND | Narrower date | £2 | £5 | £12 | £25/£65 |
| 1894 | 569 | 2,396,770 | £1 | £4 | £10 | £20/£50 |
| 1895 | 570 | 2,852,853 | £10 | £20 | £50 | £100/£150 |

All Royal Mint coins 1875 to 1878 have an 'R' with a forked tail; the Heaton Mint issues do not. So an 1875 with forked 'R' might well be an 1875H with 'H' removed to Increase value!

VICTORIA *Old veiled or widow head, date on reverse, Bronze 20mm*

| | | | | | | |
|--------|-----|--------------------------------------|-----|----|-----|---------|
| 1895 | 571 | Inc with bun head | £1 | £3 | £6 | £18/£35 |
| 1896 | 572 | 3,668,610 | 50p | £2 | £5 | £10/£30 |
| 1897 | ND | Bright finish | | | £12 | £30/£60 |
| 1897 | | 4,579,800 Blackened, see note below. | | | | |
| 1897* | 574 | Horizon as 1896 | £1 | £3 | £9 | £20/£40 |
| 1897** | 575 | Higher horizon | £1 | £3 | £9 | £20/£40 |
| 1898 | 576 | 4,010,080 | 20p | £2 | £8 | £10/£24 |
| 1899 | 577 | 3,864,616 | 50p | £1 | £7 | £10/£24 |
| 1900 | 578 | 5,969,317 | 20p | £2 | £6 | £10/£24 |
| 1901 | 579 | 8,016,459 | 20p | £1 | £3 | £5/£10 |

From 1897-1917 all farthings were artificially blackened to distinguish them more clearly from the half sovereign.

* : The '7' points TO a border tooth

** : The '7' points BETWEEN two teeth

Victoria 1895 Farthing reverse. Old (last) head type (Obverse is similar to the veiled head penny on p25)

Elizabeth II 1954
Farthing

Obverse 1: Poorly defined. The cross points TO a border bead.
Obverse 2: Sharper. The cross points BETWEEN two border beads.

Reverse A: (dies of George VI) - 'F' points BETWEEN two beads.
Reverse B: Similar, but the 'F' points TO a border bead.

1953 Obverse/Reverse Rarity Scale 1 + A is scarce. 2 + A is rare. 1 + B is rare. 2 + B is very common.

Halfpennies 1895 - 1920

Date **FMAN** **Mintage/details** **Fine** **VF** **EF** **UNC/BU**

VICTORIA *Old or Widow head, date on reverse, Bronze 26mm*

| | | | | | | |
|------|-------|------------------------|----|----|----|---------|
| 1895 | 370 | 3,032,154 | £1 | £3 | £6 | £15/£30 |
| 1896 | 371/2 | 9,142,500. MV | £1 | £2 | £5 | £15/£30 |
| 1897 | 374 | 8,690,315 | £1 | £2 | £6 | £18/£35 |
| 1897 | 373 | Higher tide, see right | £2 | £4 | £7 | £15/£30 |
| 1898 | 375 | 8,595,180 | £1 | £3 | £9 | £15/£30 |
| 1899 | 376 | 12,108,001 | £1 | £3 | £7 | £15/£25 |
| 1900 | 377 | 13,805,190 | £1 | £2 | £8 | £14/£18 |
| 1901 | 378 | 11,127,360 | £1 | £2 | £4 | £9/£20 |

The 1897 higher tide variety has the tide level with the folds in Britannia's robe. The normal tide type is level with the bottom of the robe. The veiled head Victorian Halfpenny was very similar in style to the penny, shown on page 25.

Victorian Bun head 1888 Halfpenny

Edward VII 1903 Halfpenny

Date **FMAN** **Mintage/details** **VF** **EF** **UNC/BU**

EDWARD VII *Britannia Reverse, Bronze 26mm*

| | | | | | | |
|------|-----|----------------|----|-----|---------|-----------|
| 1902 | 381 | 13,672,960 | £2 | £5 | £10/£25 | |
| 1902 | 380 | Low tide, Fine | £9 | £22 | £45 | £100/£125 |
| 1903 | 382 | 11,450,880 | £2 | £9 | £16/£30 | |
| 1904 | 383 | 8,131,200 Fine | £3 | £6 | £15 | £30/£60 |
| 1905 | 384 | 10,124,800 | £1 | £10 | £10 | £22/£60 |
| 1906 | 385 | 11,101,440 | £1 | £9 | £9 | £12/£55 |
| 1907 | 386 | 16,849,280 | £1 | £9 | £9 | £12/£55 |
| 1908 | 387 | 16,620,800 | £1 | £9 | £9 | £20/£50 |
| 1909 | 388 | 8,279,040 | £4 | £12 | £12 | £20/£30 |
| 1910 | 389 | 10,769,920 | £1 | £8 | £8 | £18/£30 |

"LOW TIDE" VARIETY referred to on the left and on page 25 may be determined thus: if the horizon meets Britannia at the point, below the knee, where right and left legs cross; NORMAL tide is indicated. If, however, the horizon meets Britannia at a much lower point - nearer the hem of her drape - then a LOW TIDE variety has been detected. Comparison with a normal tide other date Edward VII coin makes it much easier to tell.

| 1837 | P1460 | 174,720 | | £40 | £95 | £225 | £500/£600 |

trunc = truncation, the base of the monarch's neck.

Reverse types of George IV pennies all concern the cross of St. Andrew in the flag on the shield.

Rev A = No central line along arms of cross

Rev B = Thin, raised line along cross

Rev C = Thick, broad raised line

With many worn coins these varieties are impossible to spot, especially without a comparison.

Victoria 1860 Penny with toothed border

1860 and 1861 reverse types: (These very minor varieties can only be identified with higher grade coins, and it can be very difficult without a few pennies for comparison purposes!)

Rev. A = The crosses are outlined with treble incuse lines, Britannia's thumb touches cross of St. George, no rock to left of lighthouse.

Rev. B = The crosses are outlined by close, double raised lines, Britannia's thumb does not touch cross. no rock to left of lighthouse.

Rev. C = Similar to Rev. B, but lines thinner and wider apart. Small rock to the left of lighthouse.

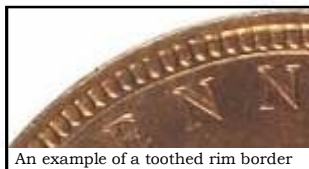

Rev. C* = As Rev. C, but with minor modifications to rocks and sea and, of course, a toothed border.

Rev. D = As Rev. C, but L.C.W. incuse below foot.

Rev. E = No L.C.W signature, thumb touches St. George's Cross; no vertical lines to lantern.

Rev. F = No L.C.W signature, thumb does not touch Cross, lantern has six vertical lines.

Rev. G = Britannia has long, thin neck; her helmet is tall and narrow; a tall thin lighthouse.

An example of a toothed rim border

A beaded rim border

*1880 Pennies either have rocks to the left of the lighthouse, or not. Values are the same.

*The aged portrait of 1881 is difficult to spot with worn coins, the easiest method is to count the leaves in the wreath - the aged portrait has 15, the normal version has 17.

*There are two 1883 varieties (FMAN 116 and 118) but most dealers do not distinguish. The easiest way to tell the difference is one has the 'RI' of BRITT joined at the bottom, the other doesn't.

IMPORTANT: This public domain free PDF download is not the latest edition. Most of the coin values in this book have increased significantly since mid 2004 when this document was compiled. Some of the values shown have in fact more than doubled since 2004, a few have even gone down slightly. The newest edition of this publication contains 36 more pages and includes gold coins and a full introduction to each denomination. The latest version is available from www.rotographic.com/downloads.htm 25

GEORGE V *Bronze 31mm*

| | | | | | | |
|-------|-------|-------------|----|-----|-----|-----------|
| 1911 | 171 | 23,079,168 | | £4 | £8 | £20/£30 |
| 1912 | 172 | 48,306,048 | | £3 | £8 | £15/£30 |
| 1912H | 173 | 16,800,000 | | £9 | £40 | £80/ |
| 1913* | 174-7 | 65,497,872 | | £3 | £10 | £20/£40 |
| 1914 | 178 | 50,820,997 | | £3 | £9 | £15/£35 |
| 1915 | 179 | 47,310,807 | | £3 | £5 | £25/£45 |
| 1916 | 180 | 86,411,165 | | £2 | £3 | £9/£20 |
| 1917 | 181 | 107,905,436 | | £2 | £3 | £20/£35 |
| 1918 | 182 | 84,227,372 | | £2 | £3 | £12/£25 |
| 1918H | 183 | 3,660,800 | £1 | £12 | £70 | £140/£200 |

* 1913 - Four minor varieties, all are fairly common and spotting them depends on the pointing of the 'P' on the reverse, and the position of the colon between 'GRA : BRITT'.

1895 - Rev A: trident to the 'P' is 2mm. No sea behind Britannia. Rev B: trident to P is 1mm. Sea behind (to left of) Britannia.

1897 - The higher tide meets Britannia well above the hemline. The normal tide coin is illustrated.

A veiled head Victorian and an Edward VII penny. The reverses were the same as the early George V reverse on the following page.

*1905 FMAN 160 and 161 either have upright part of the 'E' in 'PENNY' pointing at a rim bead or at a gap. *1908 FMAN 164, 164A, 165 and 166 - Four slight varieties, most are common with the exception of 164A which has the colon after BRITT pointing to a rim tooth. This variety is rare.

* 1953 Circulation pennies were only issued in the 9 coin plastic sets.

** 1967 Mintage includes pennies minted in 1968, 69 and 70 but dated 1967.

Elizabeth II 1964 Penny.

Three Halfpences 1834 - 1837

These tiny coins were issued for use in some colonies, and were never legal tender in the UK. They are included here because, like the fractional farthings, they are at the very least relatives of the normal British Coinage, and they do bear the latin word 'Brittanniar' (Britain). I wonder how many of these tiddlers ended up down the back of sofas, never again to see the light of day.

Victoria 1839
Threehalfpence.

Cartwheel Twopence

The largest British coin ever circulated, Cartwheel twopences are 41mm in diameter, over 5mm thick, and weigh over 60 grammes each. With the Cartwheel Penny (see page 15) these two coins were the first to be struck for circulation by the new steam powered presses installed by James Watt at the premises of Matthew Boulton in Soho, Birmingham. Those two men changed the shape (literally!) of British coinage and set the standard for all coins that followed. The fact they are such heavy coins means they are more likely to show signs of edge damage. Serious, or multiple edge knocks will result in lower values.

Threepences 1834 - 1863

Later George III, all George IV and early William IV Threepences:

At some point in the late 1700's/ early 1800's (the jury is still out on exactly when) the threepence stopped being a circulating coin minted in large numbers, and was only minted for use in the annual Maundy ceremony. The circulation of a currency threepence for use in the United Kingdom was restarted in the early part of Queen Victoria's reign. For this reason, the threepences dated between 1800 - 1833 can be found in the Maundy section, starting on page 81.

*1953 Threepences have 2 distinct levels of definition to the Queen's head. The poorly defined Obv 1 type is ex the 1953 specimen set. The sharper Obv 2 is the normal issue, a similar sharper die was also used for the 1953 proofs.

*1953 - Varieties exist with either the I of ELIZABETH pointing to a corner or with it pointing much further to the right.

Elizabeth II Brass 1960
Threepence

** The Peck reference work was compiled in 1963.

No coins newer than 1963 are catalogued.

| <i>Bare 2nd head with 3rd reverse.</i> | | | | | | |
| 1826 | 1662 | Included above | £5 | £15 | £45 | £90/£125 |
| 1827 | 1664 | 166,320 | £12 | £30 | £80 | £165/£220 |
| 1828 | 1665 | 15,840 ?? | £9 | £24 | £85 | £130/ |
| 1829 | 1666 | 403,920 | £9 | £20 | £80 | £125/ |

The Sixpences of George IV featured smaller versions of the same designs as the George IV Shillings. The 1821 Sixpence has the 1st Head and 1st reverse (images 1 and 2 on page 40). The 1824-26 Sixpences were 1st Head, 2nd reverse types (obverse as image 1, p40, reverse type as image 3 on p40). The 2nd head, 3rd reverse type Sixpence was a smaller version of obverse 4 and reverse 5 on page number 40.

Jubilee Head .925 Fine Silver 19mm

Reverse A: Gartered Shield, the withdrawn type.

| | | | | | | |
|------|-------|------------------------------------|-----|-----|-----|-----------|
| 1887 | 1752 | 3,675,607 | £2 | £4 | £8 | £15/£25 |
| 1887 | 1752A | R of Victoria struck over V (or I) | | | £75 | £125/£200 |
| 1887 | 1752B | JEB on truncation | £15 | £30 | £75 | £125/£200 |
| 1887 | 1753 | Proof | | | | £50/£75 |

Being the same size and very similar design as the half-sovereign, some were gold plated and passed off as such. This led to the withdrawal of this design of sixpence.

Victoria Young Head 1885 Sixpence

*The Young head Victoria portrait; to the untrained eye looks the same. There were however, minor changes made in 1866, and then again in 1880. The lock of hair on the cheek was removed in 1880 and that explains the two varieties for that year.

Victoria Jubilee Head withdrawn type Sixpence. The type B Sixpences had Wreath reverse, just like the Veiled head Sixpence.

Victoria Young head
1839 Shilling

* 1867 with the third lower relief Young head has not been confirmed to exist. 1877 is also believed to exist without a die number. 1881 has a variety with a shorter line under the word SHILLING (ESC 1338A). Both varieties are thought to be equally common.

IMPORTANT: This public domain free PDF download is not the latest edition. Most of the coin values in this book have increased significantly since mid 2004 when this document was compiled. Some of the values shown have in fact more than doubled since 2004, a few have even gone down slightly. The newest edition of this publication contains 36 more pages and includes gold coins and a full introduction to each denomination. ELIZABETH II, *Cupro-Nickel (no silver), just over 23mm*

All Elizabeth II Shilling ESC numbers are preceded with 1475

| | | | | |
|-------|----|-------------------------------|-----|--------|
| 1953E | K | 41,942,894 | 30p | 60p/£1 |
| 1953 | ND | Head both sides. | | £300/ |
| | | Undated but BRITT:OMN present | | |
| 1953E | L | Proofs 40,000 | FDC | £7 |

From 1937 - 1966 (and again for the 1970 proofs) Shillings were struck with either an English or Scottish reverse type. They circulated, generally, throughout the United Kingdom and are indicated in this book by the suffix E or S after the date. The different reverse types are illustrated on this page and the next.

George VI 1942 English type Shilling

George VI Scottish type Shilling reverse

** 1946E has been reported with two reverse varieties concerning the pointing of the 'IND'.

Reverse A: The 'I' points to a rim bead. **Reverse B:** The 'I' points between two beads.

Like with a lot of minor varieties on common coins, this is rarely distinguished and the values are assumed to be the same.

Section 2: Proof/Pattern Coins not intended for circulation

This section is organised in much the same way as the previous with the exception that the monarchs are no longer split up, and grade columns are not included because more often than not proof coins are collected/found in higher grades. Many of these coins are very rare and it is important to bear in mind that the prices may not be accurate with coins that are rarely seen for sale. Peck numbers are stated for all copper coins, ESC numbers for silver coins, and both Peck and Freeman for bronze coins. The coins are the same in appearance as the normal currency issues unless otherwise stated. The emphasis in this section is on Proof coins rather than patterns. Please also be aware that it is beyond the scope of this book to list all known proofs, especially those that are rarely seen, and readers are referred to the more advanced reference books listed in the bibliography.

Quarter Farthing Proofs

| Date | Type | Peck | Estimated Rarity | Value (AFDC) |
|-------------|---------------|-------------|-------------------------|---------------------|
| 1852 | Bronzed Proof | P1611 | Extremely Rare | |
| 1853 | Bronzed Proof | P1613 | Extremely Rare | |

Halfpenny Proofs 1797 - 1826

| Date | Type | Peck | Estimated Rarity | Value (AFDC-FDC) |
|------|------|------|------------------|------------------|
|------|------|------|------------------|------------------|

1797+ Many 'Cartwheel-esque' patterns exist in various metals for 1797 and 1798, and 1798+ proofs/patterns similar to the circulation type exist in many different metals for 1799 1799. All are at least very rare, and Peck should be consulted to aid identification of these coins. Speculation and recent prices would lead me to believe that each would probably be worth at least £300, with rarer types being worth considerably more.

Noteable examples include:

| | | | | |
|------|--|--------------------|------------------|--------------------|
| 1797 | Copper Pattern | P1154 | Very Rare | Approx £250+ (VF) |
| 1799 | Gilt Pattern | P1156 | Very Rare | Approx £500+ (FDC) |
| 1799 | Gilt Pattern | P1233 | Very Rare | Approx £120+ (EF) |
| 1799 | Bronzed Copper Pattern | P1234 | Very Rare | Approx £250+ (FDC) |
| 1799 | Copper pattern | P1235 | Very Rare | Approx £250+ (UNC) |
| 1799 | Bronzed Copper Pattern | P1247 | Very Rare | Approx £250+ (UNC) |
| 1805 | Various patterns and proofs exist in various metals, all are at least very rare and would probably sell for £250 - £500. Restrikes also exist. Peck should be consulted. | | | |
| 1806 | Same situation as 1805, proofs and restrike proofs in various metals exist. Values are probably in the region of £300 - £500 for many types. | | | |
| 1807 | Restrike Gold Proof | P1381 | Excessively Rare | |
| 1807 | Restrike Silver Proof | P1382 | Excessively Rare | |
| 1807 | Restrike Bronzed Proof | P1383 | Very Rare | |
| 1807 | Restrike Copper Proof | P1384 | Very Rare | |
| 1807 | Restrike Aluminium Proof | P1385 | Extremely Rare | |
| 1825 | Copper Proof | P1421 | Very Rare | |
| 1826 | Bronzed Copper Proof | P1423/P1426/P1428* | Very Rare | £300+ (FDC) |

* For 1826 Proofs, varieties with the saltire exist just as with the currency coins.

| | | | | |
|------|--------------|-------|----------------|----------|
| 1826 | Copper Proof | P1424 | Very Rare | |
| 1826 | Copper Proof | P1429 | Extremely Rare | £600+ ?? |

With thick line down arms of saltire.

Penny Proofs 1797 - 1853

| Date | Type | Peck | Estimated Rarity | Value (AFDC-FDC) |
|--|--|---------------|------------------|---------------------|
| 1797 | Many proofs and restrikes in various metals including silver, gold, gilt copper, bronzed copper and tin. It is beyond the scope of this book to list all types, and readers are referred to the C Wilson Peck book. See bibliography. Noted are: | | | |
| 1797 | Gold Proof | P1111 ? | Excessively Rare | £20,000 approx |
| 1797 | Bronzed Copper Proof | ND | Extremely Rare | £300+ |
| 1805 | As with 1797, many patterns exist in various metals. | | | |
| 1806 | Many Proofs of various metals exist, noted are: | | | |
| 1806 | Gilt Copper Proof | P1325 | Very Rare | £400+ |
| 1806 | Copper Proof | P1327 | Very Rare | £300+ |
| 1806 | Bronzed Copper Proof | P1333 | Very Rare | £150+ (EF) |
| 1807 | Gilt Copper Proof | P1344 | Excessively Rare | |
| 1807 | Bronzed Copper Proof | P1345 | Extremely Rare | |
| 1807 | Restrike in various metals also exist. | | | |
| 1825 | Copper Proof | P1421 | Very Rare | £300+ |
| 1826 | Bronzed Copper Proof | P1423 (Rev A) | Very Rare | |
| 1826 | Bronzed Copper Proof | P1426 (Rev B) | Very Rare | |
| 1826 | Bronzed Copper Proof | P1428 (Rev C) | Very Rare | |
| 1826 | Copper Proof | P1424 (Rev A) | Very Rare | |
| 1826 | Copper Proof | P1429 (Rev C) | Very Rare | |
| Reverse types for 1826: A = No central line down arms of saltire. B = Thin raised line down arms of saltire. C = Thick raised line down arms of saltire. The saltire is the cross of St. Andrew as part of the Union flag on Britannia's shield. | | | | |
| 1831 | Bronzed Copper Proof | P1462* | Very Rare | £250+ |
| Up/Up alignment. See Page 92. | | | | |
| 1831 | Bronzed Copper Proof | P1463* | Very Rare | £250+ |
| Up/Down alignment. See Page 92. | | | | |
| 1839 | Bronzed Copper Proof | P1479 | Very Rare | £450+ |
| 1841 | Silver Proof | P1481 | Excessively Rare | £2000 ?? |
| 1841 | Bronzed Copper Proof | P1482 | Very Rare | £400+ |
| 1841 | Copper Proof | P1483 | Extremely Rare | £400+ |
| 1844 | Copper Proof | P1488 | Unconfirmed | |
| 1853 | Bronzed Copper Proof | P1501 | Extremely Rare | £250 NFDC. £500 FDC |
| 1853 | Copper Proof | P1502 | Very Rare | £500 |

Left: George III 1800 maundy set. The last set before the current types were adopted in 1817. Below: 1882 Victoria maundy set. The reverse types have remained very similar ever since.

| | |
|------|---------|
| 1966 | £60/£75 |
| 1967 | £60/£75 |
| 1968 | £60/£75 |
| 1969 | £60/£75 |
| 1970 | £55/£70 |

Now Decimal pence.

| | |
|------|---------|
| 1971 | £60/£80 |
| 1972 | £60/£80 |
| 1973 | £60/£80 |
| 1974 | £60/£80 |
| 1975 | £60/£80 |
| 1976 | £60/£80 |
| 1977 | £60/£80 |
| 1978 | £60/£80 |
| 1979 | £60/£80 |
| 1980 | £60/£80 |
| 1981 | £60/£80 |
| 1982 | £60/£80 |
| 1983 | £60/£80 |
| 1984 | £60/£80 |
| 1985 | £60/£80 |
| 1986 | £60/£80 |
| 1987 | £60/£80 |

Maundy obverses usually use the same bust as the circulation coinage. With the exception that the laureate George IV bust as shown at the top, on page 40 was used for all George IV maundy money and the early Elizabeth II bust (see page 45) has been, and is still being used for all Elizabeth II maundy money.

Victoria 1898 Maundy Groat

IMPORTANT: This public domain free PDF download is not the latest edition. Most of the coin values in this book have increased significantly since mid 2004 when this document was compiled. Some of the values shown have in fact more than doubled since 2004, a few have even gone down slightly. The newest edition of this publication contains 36 more pages and includes gold coins and a full introduction to each denomination. The latest version is available from www.rotographic.com/downloads.htm

Maundy Singles

It's generally preferred to collect complete maundy sets rather than try to obtain each date individually, mainly because individual coins can be difficult to track down of certain dates, and it can often work out more expensive. Also, complete sets tend to all have the same toning, and they therefore match better. Individual coins do often appear for sale with prices varying greatly. Below is a list of approximate prices for coins in Uncirculated condition:

| | UNC |
|--------------------------|-----------|
| George III | |
| 1800 set | |
| Fourpence | £30 - £50 |
| Threepence | £30 - £50 |
| Twopence | £25 - £40 |
| Penny | £25 - £35 |
| 1817 - 1820 type | |
| Fourpence | £30 - £40 |
| Threepence | £30 - £40 |
| Twopence | £20 - £30 |
| Penny | £20 - £30 |
| George IV | |
| Fourpence | £20 - £30 |
| Threepence 1822 | £40 - £50 |
| Threepence (others) | £20 - £30 |
| Twopence | £15 - £25 |
| Penny | £15 - £25 |
| William IV | |
| Fourpence | £20 - £30 |
| Threepence | £30 - £40 |
| Twopence | £20 - £30 |
| Penny | £15 - £25 |
| Victoria | |
| Young Head (1838 - 1887) | |
| Fourpence | £20 - £30 |
| Threepence | £35 - £40 |
| Twopence | £15 - £20 |
| Penny | £10 - £15 |

| Twopence | Around £20 |
| Penny | Around £20 |
| More recent maundy sets/ singles are not often offered. | |

Section 4: Decimal Coinage Half Penny - Penny

Although decimal British coinage is (or at least will be) historically just as important as pre-decimal British coinage, the fact that none of it in circulation is older than 1971 sometimes leads to it being ignored completely by collectors.

Many collectors of British coins feel that the commemorative issues by the Royal Mint, including all their variations in precious metals, striking quality and presentation packaging, are not especially collectable in their own right. As a consequence of the reduced demand the real market values shown in these listings are often less than the original issue price of the items.

With the above in mind, the decimal section will not show illustrations of every coin type and will perhaps be a little briefer than the pre-decimal section. Like the pre-decimal section it will be organised in rising order of face value.

A Glossary of some of the terms used in this book

Many of the abbreviations used in this book are standard Coin collectors jargon, there are however, a few that may not be so obvious. This glossary should clear things up:

Alignment: The relationship between the obverse and reverse of the coin. Either the reverse is upside down compared to the obverse when rotated with fingers at the top and bottom of the coin, or the reverse is up the same way when the coin is rotated with fingers at the top and bottom of the coin. The latter is the most common alignment for British coins dated 1860-date and may be referred to in this book as up/up. In the same way the upside down alignment may sometimes be referred to as up/down.

Berries: Usually refers to the number of berries in the wreath around the monarch's head.

H: An 'H' after the date in the first column indicates the coin was struck at the Heaton Mint in Birmingham. The 'H' mintmark will appear on the coin either next to, or under its date.

KN: A 'KN' after the date in the first column indicates the coin was struck at the Kings Norton Mint in Birmingham. The 'KN' will appear on the coin next to the date.

Modified Effigy: (George V only) In the absence of a direct comparison, the modified effigy (or modified head) can be distinguished by the initials which appear on the truncation of the neck. Before modification, the initials B.M. are placed near the centre of truncation. After modification they appear, without stops, well to the right thus: BM (not B.M.) The initials are those of the designer of the coin: Bertram Mackennal.

Mule: A Mule is when a coin gets made with the wrong combination of obverse and reverse. The 1983 Twopence with the reverse reading 'NEW PENCE' (the old reverse) is a good modern example. Illustrated on front cover.

Obverse: (or Obv) The side of the coin with the head of the Monarch on.

Pattern: A coin type that is not used for circulation. i.e. a trial piece.

Piedfort - A coin that is struck on a thicker blank than is usual. Relatively recently the Royal mint starting coining Silver Piedfort coins.

Pointing/Points: To distinguish a different die used to strike a particular coin, often 'pointings' are used. They normally refer to a letter or design element on the coin, and to whether it points directly at, or between two border teeth or another element of the coin.

Proof: A special striking of a coin using specially prepared and polished dies and blanks.

Reverse: (or Rev) The opposite side of the coin to the obverse, or the 'tails' side.

Teeth/Beads: The small circles surrounding the inner rim of many British coins. Beads are circular, teeth are not, and are generally attached to the rim.

Truncation: (or trunc) The base of the monarch's neck, often containing the designers initials.

Bibliography

The following books were referred to during the writing of this book, and are recommended for further reading:

Previous editions of "**Collectors' Coins Great Britain**", by R J Marles. (out of print)

"**Collectors' George III Coins**", by R J Marles. (out of print)

"**English Copper, Tin and Bronze coins in the British Museum 1558-1958**", by C Wilson Peck. (out of print)

"**The Bronze Coinage of Great Britain**", by Michael J Freeman. (out of print)

"**English Silver Coinage since 1649**", by P Alan Rayner. (Available new)

"**The British Bronze Penny**", by Michael Gouby. (Available only from the author)

"**Standard Catalog of World Coins**", by C L Krause and C Mishler. (Available new, published in the USA)

Also recommended are: "**The Early British Bronze Bun Penny 1860 - 1865 and their varieties**", by John Jerrams, and "**British Silver Coins since 1816: With engravers Patterns and Proofs and unofficial pieces**", by Peter J Davies.
